

Herbal Research and Technical Advisor

Artemis Limited is a New Zealand owned and operated plant medicine company which is dedicated to creating exceptionally effective, natural and safe treatment options. Our products are distributed locally in health stores, pharmacies, online and practitioner clinics. We have a rapidly growing export business.

We have an opportunity for an energetic, analytical and confident person to join our small but highly talented team. This role is initially part-time (up to 20 hours a week), however, there is room for the position to become full-time as the business grows.

The role will support:

- Concept development and formulation trials
- Literature research, identifying scientific data that is relevant to new product concepts and proposals
- Technical input in the product development process, and liaise with external R&D suppliers and laboratories to support analytical and stability testing
- Product development by identifying suppliers and ensuring all medicinal plant extracts meet Artemis' strict quality standards; and to provide quality control input and approval for herb suppliers
- Ensuring Artemis products and processes are compliant with regulatory and legal requirements.
- Internal technical capability and answer customer or professional queries relating to health concerns to protect brand credibility and build loyalty

The successful candidate must have experience in researching and appraising scientific literature and a minimum of 5 years working in the natural health industry, pharmaceutical industry or life sciences. Competency in the full Microsoft Office suite is essential. A recognized professional qualification in plant medicine (Western Herbal Medicine) or equivalent work experience plus a bachelor's degree in science (preferably in Pharmacology or Pharmacy) are required.

Please send your CV, relevant references and covering letter to:
